About

MSc Software Engineering student at FCUL with a Computer Engineering background, focused on back-end services, database systems, and cloud architecture, with hands-on experience across mobile (iOS, Android) and full-stack web development. Builds projects end-to-end, from data modelling to cloud deployment, using Kotlin, Swift, TypeScript, Spring Boot, PostgreSQL, Docker, and Kubernetes. Combines this with five years of experience teaching IT courses, developing clear communication and structured explanation skills.

Work Experience

- 09/2019 – **IT Course Instructor**, *Academia do Saber – Center for Studies, Tutoring and Training*, Present
Queluz, Portugal
- Preparation of classes and structuring of various courses taught.
 - Teaching of various IT courses taught at the institution.
 - Training provided in the following areas/programs: Office, Windows, Internet, Internet Security.

Education and Training

- 2024 – **MSc in Software Engineering**, *Faculdade de Ciências da Universidade de Lisboa*, Lisbon, Present
Portugal
- Relevant coursework: Mobile Computing (18/20), Parallel and Concurrent Programming (16/20), Advanced Database Systems (18/20), Cloud Computing (19/20).
 - Current grade: 16/20 .
- 2021 – 2024 **BSc in Computer Engineering**, *Instituto Superior de Engenharia de Lisboa*, Lisbon, Portugal
- Relevant coursework: Programming (17/20), WEB Application Development (15/20), Software Laboratory (18/20), Programming on Mobile Devices (15/20).
 - Final project: PTGest - Management System for Personal Trainers and Business (18/20).
 - Final grade: 14/20.

Projects

PTGest – Full-stack platform for managing personal trainers, clients, training plans, sessions, and progress reports, supporting independent PTs, hired PTs, and companies with role-based permissions. Built with Vue.js/TypeScript frontend and Kotlin/Spring Boot/PostgreSQL backend.

Gomoku Web – Full-stack Gomoku platform with a layered Kotlin/Spring Boot backend (JDBI, REST API), React/TypeScript frontend, and Docker Compose orchestration with Nginx.

Gomoku Mobile – Android multiplayer Gomoku client (Kotlin, Jetpack Compose) with authentication, real-time matchmaking, and leaderboards.

Smartboy – Fallout-inspired Android app built with Kotlin, Jetpack Compose and Firebase, combining inventory, trading, maps, radiation alerts and chat features.

Kloud Motors – Cloud-native car marketplace with a REST/WebSocket gateway over gRPC microservices, real-time chat and auctions, deployed on GCP/Kubernetes.

Shelf Life – iOS app for tracking product shelf life and expiration dates with SwiftUI and SwiftData.

Skills

Programming: Kotlin, Swift, C, Java, Python, JavaScript, TypeScript, Go.

Backend: Spring Boot, JDBI, REST APIs, gRPC, WebSocket, Microservices, Serverless, Firebase, Express.

Databases: PostgreSQL, Firestore, MongoDB, SwiftData.

DevOps & Cloud: Git, CI/CD, Docker, Kubernetes, GCP, Linux, GitHub Actions.

Web Development: HTML, React, Vue.js, Node.js, Vite, Webpack.

Mobile Development: iOS, SwiftUI, Android, Jetpack Compose.
